

Well, it's been 2 long years since we did this last. So, its time for us to get together and do some hanger flying during a cold January Saturday night!

January 23rd at 5:00PM lets get together and talk Gyros and everything else that flys!

Please, pass along the enclosed flyer, to all of your flying buddies and wannabe's. We'll plan on Pizza and snacks as we did last time. BYOB if you like. This hall is open and ready for some indoor R/C electric flying (low ceiling beware) so bring along everything you have.

If you are a member of an EAA, PRA Chapter, or any other type of flying club, please forward along the flyer to someone in charge of the mailing list.

This is a great meeting to introduce people to Gyroplanes, but it is a great way to meet other local pilots. Again, this is a way to introduce folks to Gyros if they have had even the slightest interest. But, ultimately, its a great way to meet fellow area pilots. By Spring and Summer, this list of new friends will make for some fantastic fly-ins and places/people to see.

Have everyone RSVP to me by e-mail or phone so I can keep a general headcount of how many to expect to best plan for food etc.

We'll talk more as the date gets closer.

Thanks! Now be some good foot soldiers and spread the word.

Doug
